Art Unit: 3773

DETAILED ACTION

1. This action is responsive to the amendment filed on July 31, 2008. Claims 1-15 are pending. Claims 1 and 10 are independent. Claim 15 is newly added. Claims 6, 7, and 9 are cancelled.

Information Disclosure Statement

2. The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609.04(a) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Art Unit: 3773

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claim 1 is provisionally rejected on the ground of nonstatutory double patenting over claim 1 of copending Application No. 11/271,752. This is a provisional double patenting rejection since the conflicting claims have not yet been patented.

The subject matter claimed in the instant application is fully disclosed in the referenced copending application and would be covered by any patent granted on that copending application since the referenced copending application and the instant application are claiming common subject matter.

Furthermore, there is no apparent reason why applicant would be prevented from presenting claims corresponding to those of the instant application in the other copending application. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

Claim Objections

5. Claims 6, 7, and 9 are objected to because of the following informalities:

Applicant indicated that claims 6, 7, and 9 have been cancelled without prejudice or disclaimer on page 8 of the remarks. The claim identifiers for claims 6, 7, and 9 should be "cancelled". Appropriate correction is required.

Claim Rejections - 35 USC § 101

6. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Art Unit: 3773

Claims 1-9 and 15 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claims 1 and 15 recite the septum which is part of a human body.

Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

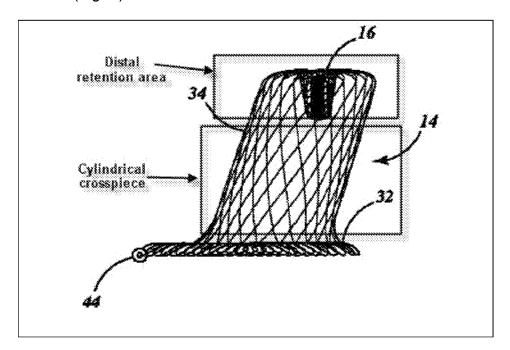

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 8. Claims 1, 2, 5, 8, 10-12, 14, and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Amplatz et al (US Pat. No.: 6,334,864).

In regard to Claims 1, 2, 5, 8, 10-12, 14, and 15, Amplatz et al discloses an occlusion device (14) comprising of a braiding of thin wires given a suitable form, having a proximal retention area (32) and a distal retention area (see Figure below), a holder (16) disposed in the distal retention area (Fig. 3), wherein the ends of the wires converge therein (Fig. 3), a cylindrical crosspiece (see Figure below); wherein the proximal retention are of the braid exhibits a flaring toward a proximal end (Fig. 3), and wherein an edge of the proximal end is configured to lie flush with the septum (Fig. 4); wherein the braiding is composed of a shape-memory material (Figs 1-4, the device is self-expanding back to original shape after deployment), wherein the braiding tapes to a diameter which suitable for delivery by one of a plurality of catheters used in the intravascular surgical procedure (Figs 1 and 2), and wherein the wires of the braiding at the open end of the proximal retention area are looped back to a closed end of the distal

Art Unit: 3773

retention are and secured at the distal retention are in the holder disposed in the distal retention area (Fig. 3).

Claim Rejections - 35 USC § 103

- 9. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 10. The factual inquiries set forth in *Graham* **v.** *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:
 - 1. Determining the scope and contents of the prior art.
 - 2. Ascertaining the differences between the prior art and the claims at issue.
 - 3. Resolving the level of ordinary skill in the pertinent art.

Art Unit: 3773

4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

- 11. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
- 12. Claims 3 and 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Amplatz et al (US Pat. No.: 6,334,864).

In regard to Claims 3 and 4, Amplatz et al discloses all the limitations of the claims as taught above but fails to disclose that the braiding is formed from a shape-memory polymer, preferably based on a polyanhydride matrix or on polyhydroxycarboxylic acids or of a block copolymer form. It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the braiding of Kotula to be formed from a shape-memory polymer based on a polyanhydride matrix or on polyhydroxycarboxylic acids or of a block copolymer form, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended used as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416.

Art Unit: 3773

13. Claim 13 is rejected under 35 U.S.C. 103(a) as being unpatentable over Amplatz et al'864 (US Pat. No.: 6,334,864) as applied to claim 10 above, and further in view of Amplatz et al'738 (US Pat. No.: 5,944,738)

In regard to Claim 13, Amplatz et al'864 discloses all the limitations of the claim as taught above but fails to disclose that the step of forming retention areas and crosspiece includes a molding and/or heat treatment. However, Amplatz et al'738 discloses a step of forming retention areas and crosspiece includes a molding and/or heat treatment (Amplatz et al'738, see Abstract). The suggestion/motivation for doing so would have been easier to shape and strengthen a pre-designed device using a mold and heating treatment on the wires. Therefore, it would have been obvious at the time of the invention to include a step of forming retention areas and crosspiece includes a molding and/or heat treatment.

Response to Arguments

14. Applicant's arguments with respect to claims 1-5, 8, and 10-15 have been considered but are most in view of the new ground(s) of rejection.

Conclusion

15. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

Art Unit: 3773

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to JING OU whose telephone number is (571)270-5036. The examiner can normally be reached on M-F 7:30am - 5:00pm, Alternative Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Uyen (Jackie) T Ho can be reached on (571)272-4696. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
